DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul A. Fournier on 06/22/2005.

The application has been amended as follows:

In the claims:

In claim 11 and 13, lines 7-8 of the claims, **"the control data including a control data being recorded as a PEP signal,"** has been deleted

Allowable Subject Matter

2. Claims 11 and 13 are allowed.

The following is an examiner's statement of reasons for allowance:

3. The prior art of record (Tanaka. U.S. Patent No. 5,553,044 in combination with Kawamura et al. U.S. Patent No. 6,424,614 and Satoh et al. U.S. patent no. 5,428,597 and further

Art Unit: 2655

in view of Yamaguchi et al.) teaches the control data reproducing apparatus comprising a low pass filter for extracting a control data signal based on the control data from the detection signal; and a control data decoder for generating the control data by the control data signal extracted by said low pass filter, but the prior art of record fails to teach or fairly suggest either alone or in combination, specifically wherein said low pass filter has a cut-off frequency, which is a double frequency of a repetition frequency of a longest pit carrying the control data, and an attenuation characteristic, which attenuates the detection signal from a standard level of said low pass filter by the cut-off frequency, as in claimed in claim 11; and wherein said low pass filter has an attenuation characteristic which attenuates more than 40 dB from a standard level of said low pass filter at a repetition frequency of a SFP (Standard Formatted Part) signal having a longest pit, as claimed in claim 13.

The features indicated above, in combination with the others elements of the claim, are not anticipated by, nor made obvious over, the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
